Annual Report on Major State Investment Funds

Annual Report on Major State Investment Funds

FISCAL YEAR 2008

LEGISLATIVE BUDGET BOARD

COVER PHOTO COURTESTY OF HOUSE PHOTOGRAPHY

LEGISLATIVE BUDGET BOARD

Robert E. Johnson Bldg. 1501 N. Congress Ave. - 5th Floor Austin, TX 78701 5121463-1200 Fax: 5121475-2902 http://www.lbb.state.tx.us

February 27,2009

The Honorable David Dewhurst The Honorable Joe Straus Members of the Eighty-first Legislature

Dear Governor Dewhurst, Speaker Straus, and Members:

As required by the provisions of Section 322.014, Texas Government Code, this report reviews the risk-adjusted performance of the following major state investment funds:

Teacher Retirement System Pension Trust Fund

Permanent School Fund

Employees Retirement System Pooled Pension Trust Funds

The University of Texas System Permanent Health Fund Permanent University Fund

Comptroller of Public Accounts

Tobacco Settlement Permanent Trust Fund Texas Guaranteed Tuition Plan Fund Permanent Public Health Fund Permanent Higher Education Fund

The report makes no recommendations regarding portfolio allocations or current management practices. It is intended as an informational resource only. In addition to the fiscal year 2008 fund information, a current fund update is included along with this report.

The LBB staff who developed and produced the report are Melissa Nelson, Kevin Kavanaugh, Scott Dudley, Dana DeHay, and Kim Irby.

Respectfully submitted,

John O'Brien Director

EXECUTIVE SUMMARY

The fiscal year 2008 Annual Report on Major State Investment Funds presents the performance for Texas' major investment funds. This report includes the risk-adjusted returns for the funds, as well as other performance and background information for each of the funds. The state investing agencies or institutions of higher education provided all the information in this report (see attachments in Appendix D). The only information calculated by the Legislative Budget Board (LBB) staff is the risk-adjusted return, the five-year average total fund rate of return and the rate of return less investment costs. This report does not make recommendations regarding portfolio allocations or current management practices. It is intended as an information resource only.

ECONOMIC/INVESTMENT ENVIRONMENT

The U.S. economy and investment environment continued to surge during the early months of fiscal year 2008, following strong performance throughout 2007. However, the large volume of sub-prime mortgage defaults combined with falling home prices and significant tightening of credit markets have rapidly changed the course of the economy, initiating the largest financial crisis in recent history and sending the U.S. economy into recession. The National Bureau of Economic Research (the organization charged with tracking US recessions) has, using several economic indicators that include real GDP, real personal income, employment, industrial production, and wholesale-retail sales, officially dated the beginning of the U.S. recession at the fourth month of fiscal year 2008, December 2007. Most economic analysts expect the recession to be deep and prolonged, lasting until late 2009 or early 2010.

Several U.S. statistical measures underscore the bleak condition of the overall economy. The roots of the economic problems start in the housing and mortgage markets. The percentage of total mortgages in default rose from 5.82 percent to 6.99 percent during fiscal year 2008. Construction has slowed significantly as well, with new housing starts in the U.S. declining 28 percent over the fiscal year. In addition, housing prices plummeted throughout the year, with the Case-Shiller Home Price Index falling 15.9 percent. This has left a significant number of consumers owing more on their mortgage than the actual value of their home, which will only drive more home owners into default. In recent years, almost all major financial institutions and large institutional investors have acquired large holdings of Mortgage Backed Securities, or assets whose value is tied to an underlying pool of mortgages. The large number of mortgage defaults has eroded the value of these assets, rendering some of them nearly worthless, thus causing massive losses for the companies who own them and sending a negative ripple effect throughout the entire economy.

These large losses in the financial sector have caused banks and other sources of commercial credit to significantly decrease lending and credit issuance to businesses. Therefore, all sectors of the economy began to feel the effects of the mortgage crisis in late fiscal year 2008. With reduced access to commercial credit, some companies have been unable to finance payroll costs and daily operations, leading to layoffs in all sectors of the economy. The national unemployment rate, which began the fiscal year at 4.7 percent, rose to 6.2 percent at the end of fiscal year 2008 and is expected to increase further in the coming months. At an annualized rate, U.S. Gross Domestic Product increased 1.9 percent in fiscal year 2008, although the measure did record two quarters of negative growth during the year. For the last several years, consumer spending has been the largest driver of GDP growth in the country. However, this spending, as measured by Real Personal Consumption Expenditures, fell 0.18 percent in fiscal year 2008. This decrease in spending, coupled with the 41.2 percent drop in the Consumer Confidence Index over the same period, provides evidence that consumers are beginning to respond to the deteriorating economic environment. Finally, the overall price level in the U.S., as measured by the Consumer Price Index, remained relatively stable, increasing by 4.97 percent during the fiscal

Due to the struggling economy, investment conditions were poor through most of fiscal year 2008. All major equity markets, both domestic and foreign, witnessed significant decline throughout the year. Three of the most commonly monitored U.S. indexes, the Dow Jones Industrial Average, the NASDAQ composite index, and the S&P 500 index, declined 14.17 percent, 9.99 percent, and 13.87 percent, respectively. Foreign markets performed poorly as well, with the FTSE (London) dropping 20.89 percent and the Nikkei (Japan) falling 10.75 percent. Shortand long-term interest rates also fell sharply during the year as investors fled to safer government-backed debt in response to the deteriorating stock and private debt markets. The yield on a 90-day Treasury Bill fell from 4.35 percent

to 1.69 percent while the yield on a 10-year Treasury note dropped from 4.56 percent to 3.81 percent during fiscal year 2008. Commodity markets, another important component of the investment environment, experienced extreme volatility throughout the fiscal year, highlighted by a large spike in July and followed by steady declines at the end of the year. The S&P GSCI and Reuters CRB, two benchmark indexes that track commodity markets, increased 41.7 percent and 25.9 percent, respectively, in fiscal year 2008. Much of this increase was due to record increases in oil and natural gas prices: the WTI spot price rose 53.9 percent, ending the year at \$115.55, while the Henry Hub spot price increased 48.3 percent, to end the year at \$8.32.

The Federal Reserve Bank and U.S. Congress have taken several actions in an attempt to avoid an economic crisis and rescue the distressed financial system. On October 3, 2008, Congress passed the Emergency Economic Stabilization Act which authorized the Treasury Department to spend up to \$700 billion in order to stabilize U.S. credit markets. In addition, the American Recovery and Reinvestment Act was signed into law on Feburary 17, 2009. The act, which will cost approximately \$787 billion dollars, allocates \$288 billion to tax cuts for individuals and business owners and \$499 billion for spending on a variety of programs including infrastructure, education, social services, and energy. The Federal Reserve has lowered the federal funds target rate to less than 0.25 percent at the end of calendar year 2008 and made the Federal Reserve Discount Window available to several large U.S. banks in an effort to spur action in credit markets and encourage lending to consumers and businesses. While the investment environment is expected to remain poor throughout the fourth quarter of 2008 and much of 2009, these measures should, to some extent, lessen the impact on investors of the sub-prime mortgage crisis and impending U.S. recession.

ENDING MARKET VALUE

The ending market value of the major investment funds for fiscal year 2008 was \$169.3 billion, \$11.2 billion less than value of the funds at the end of fiscal year 2007. The funds and their ending market values are shown in **Figure 1**.

RATES OF RETURN

The average rate of return is -3.54 percent and range from 8.22 percent to -6.47 percent as **Figure 2** shows.

^{*}Performance benchmarks were calculated by the agencies or institutions and are identified in the background information provided for each fund in Appendix B.

Note: Each fund has different investment objectives and strategies, some required by law, that affect its benchmarks and performance. PSF–GLO rates of return are based on year ending June 30, 2008. Source: Investing agencies and UTIMCO.

The total fund rate of return used in this report is the gross time-weighted rate of return for all investments of each fund. The time weighted rate is calculated before related investment expenses are deducted, and is adjusted to eliminate the effect of timing of cash flows due to contributions and withdrawals. The rate of return less investment costs as shown in **Figure 3** presents the rate of return after related investment expenses are deducted. The five-year average rate of return is calculated using a geometric average of the annual rates of return for the five-year period.

Permanent Public Health Fund	-6.65%	
Permanent Higher Education Fund	-6.76%	

Note: Detailed fund investment costs are presented in Appendix B. PSF–GLO rates are based on a year ending June 30, 2007. Source: Investing agencies and UTIMCO provided the rates of return and investment costs used in the calculation.

The annual rates of return reflect both income earned and change in fund value, without consideration of the risk of fund investments. **Figure 4** shows the average rates of return over five years .

RISK-ADJUSTED RETURN

The risk-adjusted return is a tool used to compare the performance of funds that have different types and proportions of assets, and quantifies a fund's return relative to its risk. The Sharpe ratio determines the risk-adjusted return for each fund. (The calculation of the Sharpe ratio is explained below.) As **Figure 5** shows, the returns range from 0.74 percent to 1.28 percent.

FIGURE 4
AVERAGE ANNUAL RATES OF RETURN
FISCAL YEARS 2004 TO 2008

FUND	RATE OF RETURN
Teacher Retirement System Pension Trust Fund	8.94%
Permanent School Fund – TEA	8.37%

Permanent Public Health Fund	0.81%
Permanent Higher Education Fund	0.80%

Note: The PSF-GLO invests solely in real estate therefore it is not appropriate to use the GLO's RAR as measured by the Sharpe Ratio in comparison to the other funds.

SOURCE: The rates of return used in the Sharpe Ratio calculations are the monthly rates of return provided by the investing agencies and UTIMCO.

A risk-adjusted return is a single statistic that reflects both the return and volatility of returns over time. A generally accepted measure for computing the risk-adjusted return is the "Sharpe ratio," developed by Nobel Laureate William Sharpe. The Sharpe ratio is often used to rank the risk-adjusted performance of various portfolios over the same

period of time. The results of the Sharpe ratio indicate the amount of return earned per unit of risk.

The formula for the Sharpe ratio follows:

For example, a portfolio with an average annualized return of 10 percent over the past five years, the growth of which consistently, year after year, fell within a tight range of 7 percent to 12 percent, would reflect a higher (better) riskadjusted return than another portfolio that averaged the same 10 percent annualized return, but varied wildly year to year ("higher volatility"), with returns ranging from losses of 20 percent to extraordinary gains of 50 percent. Risk-adjusted returns should only be calculated for a minimum period of three years because, for a single year, the statistic is unreliable. For purposes of this report, the Sharpe ratio is constructed for a five-year period of returns.

The Sharpe ratio is a figure used for comparative purposes, and does not reflect different investment objectives and restrictions, which legitimately produce different investment strategies and results for different funds.

The total return amounts used in the calculations were provided by the entities responsible for investing the funds. Each fund provided 60 monthly rates of return that were annualized and averaged over a five-year period. These monthly rates of return were also used to calculate the annualized standard deviation. The annual rate used for the risk-free rate is the average of the daily yield of the 90-day Treasury Bill throughout the respective fiscal year. All rates were pulled from the Federal Reserve Economic Database.

USE OF EXTERNAL MANAGERS/ADVISORS FOR INVESTMENTS

Each of the funds varies in its use of external managers or advisors to invest its assets. **Figure 6** shows the portion of assets managed internally and externally for fiscal year 2008.

FIGURE 6
PORTION OF ASSETS MANAGED
INTERNALLY AND EXTERNALLY
FISCAL YEAR 2008

FUND	INTERNAL	EXTERNAL
Teacher Retirement System Pension Trust Fund	95.0%	5.0%
Permanent School Fund – TEA	73.6%	26.4%
Permanent School Fund – GLO	44.0%	56.0%
Employees Retirement System Pension Trust Fund	70.3%	29.7%
Permanent University Fund	12.6%	87.4%
Permanent Health Fund	11.0%	89.0%
Tobacco Settlement Permanent Trust Fund	0.0%	100.0%
Texas Guaranteed Tuition Plan Fund	0.0%	100.0%
Permanent Public Health Fund	0.0%	100.0%
Permanent Higher Education Fund	0.0%	100.0%

NOTE: The UT-PHF assets are invested in the University of Texas System General Endowment Fund (GEF). The above percentages reflect the allocation of the GEF assets. The PSF-GLO percentages reflect the management of real estate only. SOURCE: Investing agencies and UTIMCO.

RATES OF RETURN FOR DOMESTIC EQUITY INVESTMENTS

Each of the funds has a significant amount invested in domestic equity investments. The two benchmarks for this asset group are the Standard & Poor's 500 Composite Index and the Standard & Poor's 1500 Composite Index. The S&P 500 Composite Index is the investment industry's standard for measuring the performance of actual portfolios. It is a market-value-weighted index of 500 large-cap stocks that are traded on either the New York Stock Exchange or the NASDAQ National Market System. The second benchmark is the S&P 1500 Composite Index, which includes the S&P 500 stocks plus 600 mid-cap and 400 small cap stocks.

Figure 7 shows the rates of returns for domestic equity investments for fiscal year 2008. As applicable, the rates are shown for investments managed by external managers and for investments managed internally.

FIGURE 7
RATES OF RETURN FOR DOMESTIC EQUITY INVESTMENTS
FISCAL YEAR 2008

BENCHMARKS	INTERNAL	EXTERNAL
Standard & Poor's 500 Index	-13.87%	-13.87%
Standard & Poor's 1500 Index	-13.09%	-13.09%
FUND	INTERNAL	EXTERNAL
Teacher Retirement System Pension Trust Fund	-8.98%	N/A
Permanent School Fund – TEA	-9.91%	N/A
Employees Retirement System Pension Trust Fund	-10.10%	-15.35%
Permanent University Fund	-23.44%	-12.26%
Permanent Health Fund	-21.39%	-12.23%
Tobacco Settlement Permanent Trust Fund	N/A	-13.65%
Texas Guaranteed Tuition Plan Fund	N/A	-7.60%
Permanent Public Health Fund	N/A	-13.65%
Permanent Higher Education Fund	N/A	-13.65%

Note: N/A = funds that do not have domestic equity investments for the category shown. The UT-PHF assets are invested in The University of Texas System General Endowment Fund (GEF). The above percentages reflect the allocation of the GEF assets. TRS external asset management began in August 2008; the external monthly rate of return for August was -1.7 percent.

^{**}These amounts are in the Other category.

APPENDIX A. AUTHORIZING STATUTE

SECTION 1. Chapter 322, Government Code, is amended by adding Section 322.014 to read as follows:

Sec. 322.014. REPORT ON MAJOR INVESTMENT FUNDS.

- (a) In this section, "state investment fund" means any investment fund administered by or under a contract with any state governmental entity, including a fund:
 - (1) established by statute or by the Texas Constitution; or
 - (2) administered by or under a contract with:
 - (A) a public retirement system as defined by Section 802.001, Government Code, that provides service retirement, disability retirement, or death benefits for officers or employees of the state;
 - (B) an institution of higher education as defined by Section 61.003, Education Code; or
 - (C) any other entity that is part of state government.
- (b) The board shall evaluate and publish an annual report on the risk-adjusted performance of each state investment fund that in the opinion of the board contains a relatively large amount of assets belonging to or administered by the state. The board in its report shall:
 - (1) compare the risk-adjusted performance of the funds; and
 - (2) examine the risk-adjusted performance, within and among the funds, of similar asset classes and comparable portfolios within asset classes.
- (c) Each state governmental entity that administers a state investment fund and each person that administers a state investment fund under contract shall provide the board with the information the board requests regarding the performance of the fund.

(d) The board shall publish the annual report in a format and using terminology that a person without technical investment expertise can understand.

APPENDIX B. MAJOR STATE INVESTMENT FUNDS

TEACHER RETIREMENT SYSTEM—PENSION TRUST FUND

FUND PURPOSE

The Teacher Retirement System of Texas (TRS) administers a defined benefit plan that is a qualified pension trust fund under Section 401(a) of the Internal Revenue Code. The pension trust fund provides service and disability retirement, as well as death and survivor benefits, to eligible employees of public education in Texas and their beneficiaries.

FUND CONTRIBUTIONS

Member contributions, state contributions, reporting entity contributions, and member reinstatements increased the fund's value in fiscal year 2008. The state constitution requires the Legislature to establish a member contribution rate of not less than 6 percent of the member's annual compensation and a state contribution rate of not less than 6 percent but not more than 10 percent of the aggregate annual compensation of all members of the system during that fiscal year. In fiscal year 2008, the member contribution rate remained at 6.4 percent. Senate Bill 1846, 80th Legislature, 2007, increased the state contribution rate from 6.0 percent to 6.58 percent to pay for a one-time thirteenth check payment to annuitants.

The system's Comprehensive Annual Financial Report for fiscal year 2008 reports total contributions increased \$438.3 million, or 12.1 percent over fiscal year 2007 contributions. In fiscal year 2008, member contributions were \$2.0 billion, state contributions were \$1.7 billion, reporting entity contributions were \$354.0 million, and member reinstatements were \$89.0 million. In fiscal year 2008, investment income resulted in a loss of \$4.6 billion to the fund.

FUND DISTRIBUTIONS

Deductions from the fund are predominantly retirement, death, and survivor benefits. During fiscal year 2008, the fund paid \$6.5 billion for benefits, \$275.0 million for members refunding their accounts, and \$29.0 million for administrative expenses (net of investing activity expenses). In fiscal year 2008, fund distributions totaled \$6.8 billion.

INVESTMENT OBJECTIVE

The board governs the investment process by adopting investment policies and objectives, which define the fund's strategic investment initiatives, and by monitoring

performance to measure the results of both tactical and strategic investment strategies. The total investment portfolio is structured to achieve a long-term rate of return that exceeds the assumed actuarial rate of return adopted by the board, exceeds the long-term rate of inflation by an annualized 5 percent and exceeds a composite index composed of the respective long-term normal asset mix weighting of the major asset classes operating within the defined risk parameters for the various asset classes. Investment decisions must adhere to the "prudent person" standard.

INVESTMENT AND OVERSIGHT RESPONSIBILITY

The TRS Board of Trustees holds system assets in trust and oversees the investment of the system's funds in accordance with applicable constitutional and statutory provisions. The board is composed of nine trustees who are appointed by the Governor to staggered terms of six years. Three trustees are direct appointments. Two trustees are appointed from a list prepared by the State Board of Education. Two trustees are appointed by the Governor from the three public school district active member candidates nominated for each position by employees of public school districts. One trustee is appointed from the three higher education active member candidates nominated by employees of institutions of higher education. One trustee is appointed from the three retired member candidates nominated by retired TRS members. A majority of the board is required to have financial expertise. Appointments are subject to confirmation by the Senate. Board member terms expire August 31 of odd-numbered

PERCENTAGE OF ASSETS EXTERNALLY MANAGED/ADVISED

According to TRS, internal staff manages 95 percent of TRS assets; the remaining 5 percent are managed externally. External management of funds began in August of 2008.

INVESTMENT COSTS

The cost of investing the funds for the fiscal year was \$29 million, or 3 basis points (0.03 percent) of the net assets held in trust for pension benefits at the beginning of fiscal year 2008. The investment cost consists of \$19 million in direct internal cost and \$9 million in indirect internal cost.

TEACHER RETIREMENT SYSTEM—PENSION TRUST FUND (CONTINUED)

According to TRS, investment expenses included items such as administrative support, professional fees and services, and external management fees. External management fees incurred for the first time in fiscal year 2008. Prior year investment costs were \$21 million, or 0.02 percent of the net assets.

PERFORMANCE BENCHMARKS

TRS provided the following benchmarks for fiscal year 2008. The list below is reflective of the TRS policy allocation change effective October 1, 2007:

- Fixed Income Lehman Brothers Universal
- Domestic Large Cap Equities Russell 2000
- Domestic Mid Cap Equities Russell 1000 Value
- Domestic Small Cap Equities Russell 1000 Growth
- International Equities Morgan Stanley Capital International (MSCI) Europe, Australia, Far East (EAFE) + Canada and MSCI Emerging Markets (EM)
- Private Equities Russell 3000 plus 500 bps
- Hedge Funds 3-month London InterBank Offered Rate (LIBOR) plus 2 percent
- Absolute Return 70 percent 3-month LIBOR plus 30 percent Standard & Poor's 500 Index
- Real Estate NCRIEF Open End Diversified Core Equity (ODCE) plus 0 percent/+ 2 percent

RECENT LEGISLATION

The Eightieth Legislature, 2007, enacted several bills that affect TRS.

Senate Bill 1447 provides additional investment authority to TRS by including certain private investments in the definition of "securities" and allows the board of trustees to delegate investment authority of over 30 percent of the fund assets to external managers. In addition, investments in hedge funds are restricted to no more than 5 percent of the value of the systems investment portfolio. This investment authority expires September 1, 2012.

Senate Bill 247 prohibits state funds from being invested, or remaining invested, in publicly traded securities of certain companies that engage in business operation in the Republic of the Sudan. TRS is required to identify any listed company from a list compiled and maintained by the Comptroller of Public Accounts in which they own direct or indirect holdings. Written notice must be sent to the scrutinized company encouraging or warning that company to refrain from business activities in Sudan and warning the company that it may be subject to divestment.

Senate Bill 1846 specifies the state contribution rate may not be less than the member contribution rate during a fiscal year. In the 2008–09 biennium, the state contribution rate is set by the bill at 6.58 percent of the member's annual salary. The bill also requires a one-time supplemental benefit payment to eligible annuitants by September 2007.

Senate Bill 1691, Seventy-ninth Legislature, Regular Session, 2005, makes numerous changes affecting TRS policies and operations. Changes affecting the pension fund include the addition of a minimum age of 60 to the Rule of 80 for purposes of determining eligibility for a TRS service retirement. The legislation includes a grandfathering clause that allows individuals who establish TRS membership before September 1, 2007, to retire under the eligibility rules in effect before the effective date of the legislation. Senate Bill 1691 also requires school districts that hire TRS retirees to work in TRS-covered positions to contribute an amount equivalent to the state and the active member contribution to the pension fund (currently 6.0 percent for the state contribution plus 6.4 percent for the active member contribution). In addition, for retirees enrolled in the TRSC are group health insurance program, school districts are required to pay the difference between the retiree's cost and the total cost of coverage under the plan for retirees working in TRS-covered positions. These changes to the return-towork program apply only to retirees who were not reported as retirees employed by a district as of January 2005.

Senate Bill 1691 also contains several provisions addressing other TRS policy issues, including the elimination of subsidized early retirement, changes in eligibility to participate in TRS-Care, changes in eligibility for the Partial Lump Sum Option, discontinuation for new participation in the Deferred Retirement Option Plan at the end of calendar year

TEACHER RETIREMENT SYSTEM—PENSION TRUST FUND (CONTINUED)

2005, a change in the calculation of final average salary for determining annuity amounts to include the highest five years of salary (instead of three years), and changes to policies regarding service credit purchases. TRS members are no longer permitted to purchase service credit, also referred to as "air time," after January 1, 2006. Payments on current service purchase agreements must be completed by December 31, 2005. Out-of-state service credit purchases require actuarially equivalent contributions after January 1, 2006, with some exceptions.

Senate Bill 1691, Seventy-ninth Legislature, Regular Session, 2005, requires that employers make a 6 percent contribution to the pension fund in lieu of a state contribution during the first 90 days of employment for a new employee. School district and active member contributions to TRS-Care apply from the first day of employment.

PERMANENT SCHOOL FUND—TEXAS EDUCATION AGENCY

FUND PURPOSE

The Permanent School Fund (PSF) was created expressly for the benefit of funding Texas public schools. A total return distribution, which is currently 3.5 percent of average market value, along with 25 percent of the state's motor fuel tax revenues are transferred to the Available School Fund (ASF). Monies from the fund are distributed to local public school districts based on the average daily attendance of public school students.

FUND CONTRIBUTIONS

Proceeds from the sale of PSF land, royalty, and other earnings generated by the PSF land are added annually to the fund by the General Land Office (GLO), which manages the real estate assets. In addition to these deposits, GLO transfers an authorized amount set by the State Land Board (SLB) each year to the Texas Education Agency (TEA). According to TEA, \$100.4 million was added to the PSF during fiscal year 2008.

FUND DISTRIBUTIONS

The Fund calculates its annual distribution to the Available School Fund (ASF) using a total return methodology established by constitutional amendment in 2003. Distribution rates are set by a two-thirds (2/3) vote of the State Board of Education (SBOE). If the SBOE does not set the rate before the start of the next legislative session, then the Legislature will set the distribution rate. The distribution rate cannot exceed 6 percent of the total market value, and the total distribution over the past 10 years cannot exceed the total return for the same period. The SBOE set the distribution rate at 3.5 percent for fiscal years 2008 and 2009. The rate is set at 2.5 percent for fiscal years 2010 and 2011. In fiscal year 2008, \$716.5 million was distributed to the ASF.

INVESTMENT OBJECTIVE

The investment objective, according to TEA, is long term and focused on fairly balancing the benefits between current and future generations while preserving the real per capita value of the PSF. Investment decisions adhere to the "prudent person" rule, and asset class allocations are adjusted accordingly to meet the investment objectives of the Fund.

INVESTMENT AND OVERSIGHT RESPONSIBILITY

The Texas Constitution assigns control of PSF assets to the SBOE while administrative duties related to the PSF reside with the Commissioner of Education and TEA staff. SBOE members are elected from 15 single-member districts with the Governor designating the chairman. No members are required to have experience in investment management. The SBOE appoints a Committee of Investment Advisors (CIA) to provide independent review of the Fund's investment policies, procedures, and nature of investments. Each member of the SBOE appoints a single member to the CIA and these advisors serve at the pleasure of the SBOE member who appointed them.

PERCENTAGE OF ASSETS EXTERNALLY MANAGED/ADVISED

According to TEA, approximately 26.41 percent of PSF assets are externally managed. Independent firms are used to invest funds, provide custodial and accounting services, provide securities lending services, advise on asset allocation, and evaluate investment performance.

INVESTMENT COSTS

According to TEA, the cost of administering the fund was \$9.8 million, or 4 basis points (0.04 percent) of the beginning fund balance for fiscal year 2008. This includes \$9.5 million in internal direct costs and over \$322,000 in fees paid to external entities. In addition to standard investment salaries, costs, and allocated agency overhead, TEA reports investment expenses included costs associated with accounting, information technology, compliance and support staff and fees paid for external management. Prior year investment costs were \$6.2 million, or 0.02 percent of the fund balance.

PERFORMANCE BENCHMARKS

The following benchmarks were provided by TEA for fiscal year 2008:

- Fixed Income, managed internally Lehman Brothers Aggregate Bond Index
- Domestic Large Cap Equities, Passive Standard & Poor's 500 Stock Composite Index

PERMANENT SCHOOL FUND—TEXAS EDUCATION AGENCY (CONTINUED)

- Domestic MidCap and Small Cap Equities, Passive – Standard & Poor's 1000 Stock Composite Index
- International Equities, Passive Morgan Stanley Capital International All Country World ex U.S. Net Dividends

An allocation index is calculated for each class of investments (fixed income and equity securities) to measure the overall performance. The allocation index is the weighted average rate of return of each of the above indices.

RECENT LEGISLATION

House Bill 2217, passed by the Seventy-ninth Legislature, Regular Session, 2005, added a cap of 15 percent to the portion of the PSF that may be invested in real estate.

PERMANENT SCHOOL FUND—GENERAL LAND OFFICE

FUND PURPOSE

The School Land Board (SLB) and the Commissioner of the Texas General Land Office (GLO) possess the authority to manage the state-owned lands dedicated to the Permanent School Fund (PSF). The funds are managed through the Real Estate Special Fund Account (RESFA) and can be used to acquire real estate as well as to protect, maintain, and enhance the value of the public school land. The real estate portfolio of the PSF is limited by statute to no more than 15 percent of the fund's total market value.

FUND CONTRIBUTIONS

Contributions to the RESFA include revenue from school land sales, oil and gas royalties, surface damage fees, and various other sources. According to GLO, \$881.5 million was added to the RESFA in fiscal year 2008.

FUND DISTRIBUTIONS

The RESFA distribution to TEA is authorized annually by the SLB. According to GLO in fiscal year 2008, \$100 million was distributed to TEA. In fiscal year 2009, the SLB has authorized the release of \$100 million to TEA.

INVESTMENT OBJECTIVE

The primary investment objective, according to GLO and SLB, is to pursue a long-term strategy of investing in a variety of real estate to acquire, manage, and sell Stable Return real estate investments and produce gross total returns that exceed returns on the National Council of Real Estate Investment Fiduciaries (NCREIF) Property Index by 100 basis points, measured over a rolling five-year period. Investment decisions must adhere to the "prudent person" standard.

INVESTMENT AND OVERSIGHT RESPONSIBILITY

The Permanent School Fund real estate investment portfolio is managed through a combined effort of the SLB and the Investment Advisory Committee. The SLB is comprised of the Land Commissioner, an appointee of the Governor and an appointee of the Attorney General. The GLO staff, external real estate investment fund managers, and a real estate investment advisor make up the Investment Advisory Committee.

PERCENTAGE OF ASSETS EXTERNALLY MANAGED/ADVISED

According to GLO, approximately 56 percent of the PSF real estate assets are externally managed. External investment managers manage a portfolio of commercial real estate in limited partnerships including office, industrial, retail, hotel, and apartment investments. The internally managed portfolio includes direct commercial real estate investments in areas where GLO is the only investor including raw land, industrial, and some mixed-use investments. GLO indicated 100 percent of its cash and short-term securities are externally managed by the comptroller.

INVESTMENT COSTS

According to GLO, total investment expenses for the year ending June 30, 2008 were \$4.1 million, or 30 basis points (0.30 percent) of the beginning fund balance. This amount includes \$1.7 million for direct internal costs, \$0.3 million in indirect internal expenses, and \$2.1 million for external costs. Internal investment expenses include cost for personnel and operating expenses relating to portfolio management, fees for legal services, procurement, and financial reporting. External expenses include management and incentive fees per limited partnership agreements. Investment costs for year ending June 30, 2007 were \$1.1 million, or 0.08 percent of the fund balance.

PERFORMANCE BENCHMARKS

The following benchmark has been identified by GLO for year ending June 30, 2008:

 National Council of Real Estate Investment Fiduciaries (NCREIF) Property Index (NPI)

RECENT LEGISLATION

House Bill 3699, passed by the Eightieth Legislature, 2007, broadens the SLB's authority to manage and control land, mineral, and royalty interests, and real estate investments, and to utilize investment consultants or advisors. The SLB is authorized to designate funds received from the lands, interest, and investments for deposit in the real estate special fund account (RESF).

Also, House Bill 3699 revised Natural Resources Code, Section 51.413(1), to allow the SLB to release funds from

PERMANENT SCHOOL FUND—GLO (CONTINUED)

the RESF directly to the Available School Fund (ASF). An Attorney General's Opinion was requested on the constitutionality of this transfer authority. The Attorney General's Opinion (opinion number GA-0617) found this provision of the bill inconsistent with the constitutional definition of the ASF, as set forth in the Texas Constitution, Article VII, Section 5(a). As a result, it is the Attorney General's opinion that a court would find the transfer provision unconstitutional, thus requiring any transfer of proceeds from the sale of land in the RESFA to go to the PSF for investment by the State Board of Education.

House Bill 2217, passed by the Seventy-ninth Legislature, Regular Session, 2005, allows the School Land Board to set sales prices on real property and allows fund managers to be appointed to help manage real estate investments.

EMPLOYEES RETIREMENT SYSTEM—PENSION TRUST FUND

FUND PURPOSE

The Employees Retirement System of Texas was created by the Texas Legislature in 1947 and is administered in accordance with the Texas Constitution. The system provides a retirement and disability pension plan for state employees, law enforcement and custodial officers, elected state officials and two classes of judges. The system administers the trust funds with a fiduciary obligation to the members and retirees of the system who are its beneficiaries. The Employees Retirement System of Texas Plan (ERS), the Law Enforcement and Custodial Officer Supplemental Retirement Plan (LECOS), the Judicial Retirement System of Texas Plan One (JRS I), and the Judicial Retirement System of Texas Plan II (JRS II) are single employer defined benefit pension plans. For investment purposes, the trust funds are joined, but separate accounting records are maintained.

FUND CONTRIBUTIONS

Member and state contributions are made to the trust funds as a percentage of compensation set by state law. For ERS the constitution provides that the state contribution may not be less than 6 percent nor more than 10 percent, and the member contribution may not be less than 6 percent. For 2006–07, the member contribution was 6.0 percent and the state contribution was 6.45 percent. The fiscal year 2008–09 contribution rates remained the same. Members of LECOS are also members of ERS; subsequently, no contributions from either the state or the members have been made to the fund since 1993.

JRS I is a pay-as-you-go plan, and there is no trust fund to receive contributions. Member contributions of 6 percent are deposited as unappropriated receipts in the state's General Revenue Fund. Annuity payments and refunds for this plan are appropriated each biennium; therefore, the fund has no invested assets. Contributions to JRS II are set by general law and the state General Appropriations Act. For fiscal years 2008 and 2009, the member contribution rate is set at 5.99 percent, and the state contribution rate is 16.83 percent. According to the annual valuation of the JRS II plan, the required member contribution rate is 6 percent. At the time of the valuation date, not all active members were contributing.

The 2008 Comprehensive Annual Financial Report (CAFR) reported that total member contributions to the pension trust funds for fiscal year 2008 were \$341.0 million and the total state contributions were \$373.4 million. Along with member and state contributions, investment income also contributes to the fund value. In fiscal year 2008, investment income combined with contributions resulted in a loss to the trust funds of \$544.9 million.

FUND DISTRIBUTIONS

Distributions from the pension trust fund are based on benefit payments owed, and according to ERS, equaled \$1.5 billion in fiscal year 2008.

INVESTMENT OBJECTIVE

The primary investment objective, outlined by ERS in the CAFR, is to earn a rate of return that ensures payments due to members and their beneficiaries at a reasonable cost to the members of the retirement plan and the taxpayers. The investment policy is structured around maximizing return while maintaining principal, reducing risk through diversification, and managing costs associated with implementation. Investment decisions must adhere to the duty of care as set forth in Section 815.307 of the Government Code.

INVESTMENT AND OVERSIGHT RESPONSIBILITY

The Board of Trustees of ERS has general responsibility for investment decisions. Six members serve on the board: three members are elected by participating state employees, one member is appointed by the Governor, one is appointed by the chief justice of the Supreme Court, and one member is appointed by the speaker of the House of Representatives. The board appoints an investment advisory committee. The committee members are investment professionals who are required to meet, at least quarterly, to review ERS investments. An independent consultant is also retained to evaluate and analyze results.

PERCENTAGE OF ASSETS EXTERNALLY MANAGED/ADVISED:

According to ERS, approximately 70.3 percent of the agency's invested funds are handled completely by internal staff. For

EMPLOYEES RETIREMENT SYSTEM—PENSION TRUST FUND (CONTINUED)

the remaining 29.7 percent, staff receives counsel from various fund advisors.

INVESTMENT COSTS

According to ERS, the cost of investing the funds was \$35.5 million, or 15 basis points (0.15 percent) of the beginning fund balance for fiscal year 2008. This includes \$15.0 million in direct internal expenses and \$20.5 million in external investment expenses. According to the 2008 CAFR, internal investment costs included expenses for materials and supplies, rentals, salaries and wages, professional fees and services, and other operating expenses. External investment expenses included investment advisory and consulting fees. Prior year investment costs were \$27.1 million, or 0.11 percent of the fund balance.

PERFORMANCE BENCHMARKS

The following benchmarks were provided by ERS for fiscal year 2008:

- Fixed Income Investment Grade Lehman Brothers US Aggregate Bond Index
- Fixed Income High Yield Merrill Lynch High Yield Master Trust Index II
- Global Real Estate Global Real Estate Index Series (FTSE EPRA/NAREIT)
- Domestic Small Cap Equities Standard & Poor's 600 Index
- Domestic Large Cap Equities Standard & Poor's 500 Stock Composite Index
- International Equities Morgan Stanley Capital International (MSCI) Europe, Australia and Far East (EAFE) Free Index
- Cash Equivalents 91-day U.S. Treasury Bill rate

RECENT LEGISLATION

The Eightieth Legislature, 2007, enacted several bills that affect ERS including Senate Bill 247, which prohibits state funds from being invested, or remaining invested, in publicly traded securities of certain companies that engage in business operation in the Republic of the Sudan. ERS is required to

identify any listed company from a list compiled and maintained by the Comptroller of Public Accounts in which they own direct or indirect holdings. Written notice must be sent to the scrutinized company encouraging or warning that company to refrain from business activities in Sudan, and warning the company that it may be subject to divestment.

House Bill 957, enacted by the Eightieth Legislature, 2007, provides for automatic enrollment in the 401(k) plan for any new employee hired after January 1, 2008, unless the employee elects not to participate. A minimum contribution of 1 percent will be made to a default investment product selected by the board of trustees.

Senate Bill 11, enacted by the Seventy-ninth Legislature, Regular Session, 2005, increased the state-paid ERS contribution rate for the 2006–07 biennium from 6.0 percent to 6.45 percent of the employee's salary. The contribution rate covers the normal cost of paying annuity benefits as reported in the ERS actuarial valuation report dated February 28, 2005.

Senate Bill 1176, enacted by the Seventy-ninth Legislature, Regular Session, 2005, makes permanent the 90-day wait for ERS retirement membership for newly hired employees. Payroll deductions for the 6.45 percent contributed by the state and the 6.0 percent contributed by the employee begin following the 90-day wait.

Senate Bill 1176 provides for a reduction for the standard non-occupational disability retirement annuity. The reduction is based on actuarial tables adopted by the board of trustees and applies to members who retire before reaching the normal age and length of time for retirement eligibility. The bill also makes the death benefit plan available only to active state employees and for members who filed a death plan before September 1, 2005.

Senate Bill 1176 increases interest charges on payments to reestablish service from 5 percent to 10 percent (effective September 1, 2006). The bill restricts the purchase of additional service credit to 36 months (effective January 1, 2006), and it eliminates use of other governmental service toward retirement eligibility if not established by January 1, 2006.

THE UNIVERSITY OF TEXAS SYSTEM—PERMANENT UNIVERSITY FUND

FUND PURPOSE

The Permanent University Fund (PUF) is a public endowment established by the Texas Constitution in 1876. The PUF contributes to the support of most institutions in The University of Texas System (UT System) and the Texas A&M University System. Distributions from the PUF as well as all surface lease income are deposited in the Available University Fund (AUF) for the benefit of the eligible institutions.

FUND CONTRIBUTIONS

Mineral and other incomes are added annually to the fund. According to the UT System, \$457.7 million in income earned by PUF lands were contributed to the PUF during fiscal year 2008. This represents a 67.8 percent increase over the 2007 contribution of \$272.8 million. According to the 2008 CAFR, the increased mineral contributions to the PUF in fiscal year 2008 were the result of various factors including increased oil and natural gas prices and an increase in production volume. Oil and natural gas royalties accounted for 85 percent of PUF lands mineral income.

FUND DISTRIBUTIONS

The PUF is a total return fund, and amounts from both income and changes in asset values may be distributed. PUF distributions are designed to provide a predictable, stable stream of distributions and to ensure the inflation-adjusted value of distributions is maintained over time. The UT System Board has established an annual distribution to the AUF of 4.75 percent of the prior three years' average net asset value of the PUF. According to the UT System, \$448.9 million was paid to the AUF in fiscal year 2008, and the distribution for fiscal year 2009 is set at \$530.9 million.

INVESTMENT OBJECTIVE

According to the UT System, the primary goal is to preserve the purchasing power of the PUF's assets and annual distributions by earning an average annual total return, after inflation, of 5.1 percent over rolling 10-year periods or longer. The objective is dependent on the ability to generate high returns in periods of low inflation that will offset lower returns generated in years when the capital markets underperform the rate of inflation. Investment decisions must adhere to the "prudent investor" rule.

INVESTMENT AND OVERSIGHT RESPONSIBILITY

The Texas Constitution assigns responsibility for managing the PUF's lands and investment to the UT System Board of Regents. The PUF's investment manager is the University of Texas Investment Management Company (UTIMCO). UTIMCO is the first external management corporation formed by a public university. The UTIMCO Board of Directors includes three members of the UT System Board, the chancellor of the UT System, and five outside investment professionals.

PERCENTAGE OF ASSETS EXTERNALLY MANAGED/ADVISED

According to the UT System, approximately 87.4 percent of the PUF assets are externally managed.

INVESTMENT COSTS

According to the UT System, total investment expenses were \$52.5 million, or 45 basis points (0.45 percent) of the beginning fund balance. This amount includes \$3.4 million for direct internal costs, \$4.1 million for indirect internal costs, and \$45.0 million for external expenses for fiscal year 2008. The investment expenses included costs for management fees and fees related to custodial, auditing, consulting, performance, and risk management. Investment costs for the previous fiscal year were \$82.5 million, or 0.71 percent of the fund balance.

PERFORMANCE BENCHMARKS

The Endowment Policy Portfolio return is the total index or benchmark return for the PUF. This return is the sum of the weighted benchmark return for each asset class comprising the endowment policy portfolio.

The UT System provided the following benchmark returns for each asset class. The following benchmarks represent changes to the PUF investment policy and became effective March 1, 2008:

- Investment Grade Fixed Income Lehman Brothers Global Aggregate Index
- Credit-Related Fixed Income Lehman Brother Global High-Yield Index

- Private Investments Venture Economics Custom Index

THE UNIVERSITY OF TEXAS SYSTEM—PERMANENT HEALTH FUND

FUND PURPOSE

The Permanent Health Fund (PHF) is a collection of public endowments to support research and other programs at higher education institutions. The consolidated fund includes the Permanent Health Fund for Higher Education, Permanent Funds for Health-related Institutions, and the University of Texas at El Paso. The Permanent Fund for Higher Education Nursing, Allied Health and Other Health Related Programs, and the Permanent Fund for Minority Health Research and Education were transferred to the Comptroller of Public Accounts (CPA) during fiscal year 2002. The endowments were created with proceeds from the comprehensive tobacco settlement between the State and the tobacco industry.

FUND CONTRIBUTIONS

Initially \$890 million of endowment corpus was transferred on August 30, 1999, and another \$25 million was transferred during fiscal year 2000. The Permanent Fund for Higher Education Nursing, Allied Health and Other Health Related Programs, and the Permanent Fund for Minority Health Research and Education totaling \$88.2 million, were transferred to the CPA during fiscal year 2002. No contributions have been made since then.

FUND DISTRIBUTIONS

The PHF is a total return fund, and distributions from both income and capital gains may be distributed. The University of Texas (UT) System Board initially established an annual distribution of 4.5 percent of the beginning value of the PHF. Distributions are increased annually by the average inflation rate measured by the Consumer Price Index (CPI), provided that the distribution rate remains within a range of 3.5 percent to 5.5 percent of the fund's market value. According to the UT System, \$41.9 million was transferred to eligible institutions during fiscal year 2008.

INVESTMENT OBJECTIVE

According to the UT System, the primary goal is to preserve the purchasing power of the PHF assets and annual distributions by earning an average annual real return of 5.2 percent over rolling 10-year periods or longer.

INVESTMENT AND OVERSIGHT RESPONSIBILITY

The Seventy-sixth Legislature, 1999, designated the UT System Board of Regents as the administrators of the fund. The UT System Board of Regents designated the University of Texas Investment Management Company (UTIMCO) as the investment manager. UTIMCO is the first external management corporation formed by a public university. The UTIMCO Board of Directors includes three members of the UT System Board, the chancellor of the UT System, and five outside investment professionals. The Long Term Fund (LTF) and the PHF are invested in shares of the General Endowment Fund (GEF), an internal mutual fund managed by UTIMCO.

PERCENTAGE OF ASSETS EXTERNALLY MANAGED/ADVISED

The PHF assets are invested in the UT System GEF. According to the UT System, 89 percent of the GEF assets are externally managed.

INVESTMENT COSTS

According to the UT System, total investment expenses for fiscal year 2008 were \$900,000, or 8 basis points (0.08 percent) of the beginning fund balance. This amount includes \$0.3 million in direct investment expenses and \$0.6 million in indirect investment expenses. The investment expenses included costs for management fees, custodian services, and audit fees. Investment costs for fiscal year 2007 were \$7.5 million, or 0.68 percent of the fund balance.

PERFORMANCE BENCHMARKS

The PHF assets are invested in the GEF. The Endowment Policy Portfolio return is the total index or benchmark return for the GEF. This return is the sum of the weighted benchmark return for each asset class comprising the endowment policy portfolio.

The UT System provided the following benchmark returns for each asset class. The following benchmarks represent changes to the PUF investment policy and became effective March 1, 2008:

 Investment Grade Fixed Income – Lehman Brothers Global Aggregate Index

COMPTROLLER OF PUBLIC ACCOUNTS—TOBACCO SETTLEMENT PERMANENT TRUST FUND

FUND PURPOSE

The Tobacco Settlement Permanent Trust (TSF) is an endowment to support counties with unreimbursed healthcare expenditures. The Seventy-sixth Legislature, 1999, created the endowment with proceeds from the comprehensive tobacco settlement between the State and the tobacco industry. Although the Comptroller of Public Accounts (CPA) manages the investments, the endowment is classified as a private purpose trust fund.

FUND CONTRIBUTIONS

The initial contribution of tobacco settlement proceeds was made on March 1, 2000. According to the CPA, \$1.683 billion was contributed to the fund through fiscal year 2003. No additional contributions are anticipated.

FUND DISTRIBUTIONS

The TSF is a total return fund and distributions may be made from both income as well as growth in asset values. The investment advisory committee (described below) has approved, and the CPA has adopted, a distribution rule set forth in Title 34, Part 1, Chapter 18, Section 18.2 of the Texas Administrative Code. The rule is designed to meet the investment objective of the trust (described below). According to the CPA, \$92.3 million was distributed during fiscal year 2008.

INVESTMENT OBJECTIVE

The primary investment objective, according to the CPA, is to provide a predictable, stable stream of distributions and to preserve the purchasing power of fund assets and annual distributions by earning an average annual total return, after inflation, of 5.0 percent over rolling ten-year periods or longer. Investment decisions must adhere to the "prudent investor" rule.

INVESTMENT AND OVERSIGHT RESPONSIBILITY

The CPA, through the Texas Treasury Safekeeping Trust Company, is responsible for management and oversight of the fund. An investment advisory committee composed of members from participating entities advises the CPA and approves rules governing the CPA's duties and responsibilities for the investment of and distributions from the fund. The advisory committee is composed of 11 appointed members.

The comptroller appoints one member. One member is appointed by the political subdivision that, in the year preceding the appointment, received the largest annual distribution paid from the account. The political subdivision that received the second largest annual distribution paid from the account appoints one member. Four members are appointed by the Texas Conference of Urban Counties from subdivisions that received the third through the twelfth largest annual distributions in the preceding year. The County Judges and Commissioners Association of Texas, the North and East Texas County Judges and Commissioners Association, the South Texas County Judges and Commissioners Association, and the West Texas County Judges and Commissioners Association each appoint one member.

PERCENTAGE OF ASSETS EXTERNALLY MANAGED/ADVISED

According to the CPA, 100 percent of the fund's assets are externally managed.

INVESTMENT COSTS

According to the CPA, total investment expenses for fiscal year 2008 were \$7.0 million, or 29 basis points (0.29 percent) of the beginning fund balance. This amount includes \$3.2 million for direct internal costs and \$3.8 million for external costs. Internal and external investment expenses included costs for salaries, consulting and auditing services, IT systems, compliance monitoring, overhead, risk management services, reporting and investment accounting, and management services. The investment costs for fiscal year 2007 were \$7.1 million or 0.29 percent of the fund balance.

PERFORMANCE BENCHMARKS

The CPA provided the following benchmarks for fiscal year 2008:

- Fixed Income Investment Grade 65 percent Lehman US Aggregate, 35 percent Lehman Global Aggregate ex US

COMPTROLLER OF PUBLIC ACCOUNTS—TEXAS GUARANTEED TUITITION PLAN FUND

FUND PURPOSE

The Texas Guaranteed Tuition Plan (formerly the Texas Tomorrow Fund) is a fully guaranteed prepaid tuition program, which began in January 1996. Currently the Texas Prepaid Higher Tuition Board has closed the Texas Guaranteed Tuition Plan Fund for enrollment. The plan currently accepting enrollment, The Texas Tuition Promise Fund, went into effect September 1, 2008; enrollment in this fund ends February 28, 2009. The fund is managed by the Texas Prepaid Higher Education Tuition Board. Currently, funds are being held in the state treasury until an investment policy and asset allocation structure are finalized.

FUND CONTRIBUTIONS

Existing member contributions are added annually to the Texas Guaranteed Tuition Plan fund. In fiscal year 2008, contributions totaled \$42.3 million in tuition contract payments and \$1.6 million in fees and other revenue. Investment income resulted in a loss of \$41.7 million to the fund in fiscal year 2008. According to the Comptroller of Public Accounts (CPA), contributions combined with the investment income loss resulted in a fund increase of \$2.2 million.

FUND DISTRIBUTIONS

According to the CPA, \$108.6 million was distributed to colleges for tuition payments during fiscal year 2008. An additional \$1.8 million was distributed for administrative expenses, and \$10.0 million was refunded to contract purchasers. In fiscal year 2008, fund distributions totaled \$120.4 million.

INVESTMENT OBJECTIVE

According to the CPA, the investment objective is to accumulate sufficient funds to fully meet current and future obligations to fund participants. To meet this goal, the board has developed four general objectives: preserve the purchasing power of the fund by achieving investment earnings in excess of inflation; protect the fund principal from market value erosion; keep return volatility low by employing prudent fund diversification; and invest assets in compliance with the "prudent person" standard.

INVESTMENT AND OVERSIGHT RESPONSIBILITY

The Texas Prepaid Higher Education Tuition Board directs the investment policies that are carried out by investment managers. The board is chaired by the Comptroller and includes two members appointed by the Governor and four members appointed by the Lieutenant Governor. At least two of the Lieutenant Governor's appointees are from a list of persons recommended by the speaker of the House of Representatives.

PERCENTAGE OF ASSETS EXTERNALLY MANAGED/ADVISED

According to the CPA, 100 percent of the fund's assets are externally managed.

INVESTMENT COSTS

According to the CPA, the costs of investing the fund for fiscal year 2008 were \$16.1 million, or 86 basis points (0.86 percent) of the beginning fund balance. This amount consists entirely of external investment expenses and includes securities lending fees. The investment costs for fiscal year 2007 were \$6.9 million, or 0.36 percent of the fund balance.

PERFORMANCE BENCHMARKS

The CPA provided the following benchmarks for fiscal year 2008:

- Fixed Income Investment Grade Lehman Brothers Aggregate Index and a comparable universe of domestic investment grade fixed income managers over a rolling 3- to 5-year period.
- Fixed Income High Yield Lehman U.S. Corporate High Yield 2 Percent Issuer Cap Index and a comparable universe of domestic high yield fixed income managers over a rolling 3- to 5-year period.
- Fixed Income Global Citigroup World Government Bond Index (unhedged) and a comparable universe of global fixed income managers over a rolling 3- to 5-year period.

COMPTROLLER OF PUBLIC ACCOUNTS—TEXAS GUARANTEED TUITITION PLAN FUND (CONTINUED)

- Cash Equivalents 90-day T-bill rate

COMPTROLLER OF PUBLIC ACCOUNTS—PERMANENT PUBLIC HEALTH FUND

FUND PURPOSE

The Permanent Public Health Fund (PPHF) is a collection of public endowments to support state-administered health-related programs. The consolidated fund includes the Permanent Tobacco Education and Enforcement Fund, the Permanent Children and Public Health Fund, the Permanent EMS and Trauma Care Fund, the Permanent Rural Health Facility Capital Fund, and the Permanent Small Urban Hospitals Funds. The endowments were created with proceeds from the comprehensive tobacco settlement between the State and the tobacco industry.

FUND CONTRIBUTIONS

Initially, \$475 million of tobacco settlement proceeds were contributed in fiscal year 2000. No additional tobacco proceeds have been added to the fund.

FUND DISTRIBUTIONS

The PPHF is a total return fund and distributions may be made from both income as well as growth in asset values. The annual distributions are determined by the Comptroller of Public Accounts (CPA). Annual distributions, paid quarterly, are calculated as 4.5 percent of the twenty-quarter moving-average value of the PPHF as of June 30 for the following fiscal year. The annual distributions may not exceed 7 percent of the average net fair market value of the investment assets of the fund. According to the CPA, \$19.6 million was transferred during fiscal year 2008 to the Texas Department of Health to fund the relevant programs.

INVESTMENT OBJECTIVE

The primary investment objective, according to the CPA, is to provide a predictable, stable stream of distributions and to preserve the purchasing power of each fund's assets and annual distributions by earning an average annual total return, after inflation, of 5 percent over rolling ten-year periods or longer. Investment decisions must adhere to the "prudent investor" rule.

INVESTMENT AND OVERSIGHT RESPONSIBILITY

The CPA, through the Texas Treasury Safekeeping Trust Company, is responsible for management and oversight of the fund.

PERCENTAGE OF ASSETS EXTERNALLY MANAGED/ ADVISED

According to the CPA, 100 percent of the fund assets are externally managed.

INVESTMENT COSTS

According to the CPA, the costs of administrating the fund for fiscal year 2008 were \$1.5 million, or 29 basis points (0.29 percent) of the beginning fund balance. Internal and external investment expenses included costs for consulting, auditing, IT systems, compliance monitoring, overhead, risk management, reporting, investment accounting, investment management, and fees paid to money managers and custodians. Investment costs for fiscal year 2007 were \$1.6 million or 0.31 percent of the fund balance.

PERFORMANCE BENCHMARKS

The CPA provided the following benchmarks for fiscal year 2008:

- Fixed Income Investment Grade 65 percent Lehman US Aggregate 35 percent Lehman Global Aggregate ex US
- Fixed Income High Yield Lehman Global High Yield Index
- Absolute Return 3-month T-Bill plus 3 percent and Hedge Fund Research: Fund of Fund – Conservative

COMPTROLLER OF PUBLIC ACCOUNTS—PERMANENT PUBLIC HEALTH FUND (CONTINUED)

- Stable Value Real Estate CPI plus 2 percent
- Commodities Dow Jones AIG Commodity Index
- Cash Equivalents 90-day U.S. Treasury Bill rate

COMPTROLLER OF PUBLIC ACCOUNTS—PERMANENT HIGHER EDUCATION FUND

FUND PURPOSE

The Permanent Higher Education Fund (PHEF) was created in fiscal year 1996 to establish a permanent endowment fund for higher education institutions not eligible for the PUF. The legislature is required to deposit funds each year to the PHEF until its balance reaches \$2 billion. Once the fund reaches \$2 billion, investment income will be distributed to eligible institutions.

FUND CONTRIBUTIONS

General Revenue Fund appropriations are added annually to the fund. According to the Comptroller of Public Accounts (CPA), no appropriations were added to the fund in fiscal year 2008.

FUND DISTRIBUTIONS

Currently no distributions are made from the fund. Once the fund balance reaches \$2 billion, investment income will be distributed each year to eligible institutions.

INVESTMENT OBJECTIVE

The primary investment objective, according to the CPA, is capital appreciation until the principal reaches \$2 billion. Investment decisions must adhere to the "prudent investor" rule.

INVESTMENT AND OVERSIGHT RESPONSIBILITY

The CPA, through the Texas Treasury Safekeeping Trust Company, is responsible for management and oversight of the fund.

PERCENTAGE OF ASSETS EXTERNALLY MANAGED/ADVISED

According to the CPA, 100 percent of the fund assets are externally managed.

INVESTMENT COSTS

According to the CPA, total investment expenses for fiscal year 2008 were \$1.8 million, or 29 basis points (0.29 percent) of the beginning fund balance. Internal and external investment expenses included costs for consulting, auditing, IT systems, compliance monitoring, overhead, risk management, reporting, investment accounting, investment management, and fees paid to money managers and

custodians. Investment costs for fiscal year 2007 were \$1.8 million, or 0.30 percent of the fund balance.

PERFORMANCE BENCHMARKS

The CPA provided the following benchmarks for fiscal year 2008:

- Fixed Income Investment Grade 65 percent Lehman US Aggregate 35 percent Lehman Global Aggregate ex US
- Fixed Income High Yield Lehman Global High Yield Index
- Absolute Return 3-month T-Bill plus 3 percent and Hedge Fund Research: Fund of Fund – Conservative

- Stable Value Real Estate CPI plus 2 percent
- Commodities Dow Jones AIG Commodity Index
- Cash Equivalents 90-day U.S. Treasury Bill rate

APPENDIX C. GLOSSARY

ACTIVE PORTFOLIO STRATEGY

A money-management approach based on informed, independent investment judgment as opposed to passive management (indexing). It attempts to outperform a benchmark index.

ALTERNATIVE INVESTMENTS

Investment opportunities which have not been identified by traditional public or fixed income capital markets. Also may be defined as private, nontraditional, illiquid investments. Alternative investments are accomplished almost exclusively through private offerings of debt equity interest, and are often made through entities organized as limited partnerships. Examples of alternative investments include international and emerging market stocks, hedge funds, event driven strategies, as well as illiquid equity investments such as venture capital, mezzanine financing, private equity and buyout investing, real estate, and oil and gas.

ASSET ALLOCATION

The process of diversifying an investment portfolio among asset classes (stocks, bonds, real estate, etc.) to achieve a particular investment objective. Asset allocation is used to anticipate the long-term future direction of markets and to deploy assets in a way that will result in superior performance in the context of acceptable risks. Studies have shown that asset allocation has a far greater effect on investment performance than does the selection of investment managers or the selection of individual securities.

BASIS POINT (BP)

The smallest measure used in quoting investment performance or fees. One basis point is 1/100th of one percent. Thus, 100 basis points equals one percent. A bond's yield that increased from 8.00 percent to 8.50 percent would be said to have risen 50 basis points. A management fee of 25 basis points represents 0.25 percent of value of the assets managed.

BENCHMARK

A reference that serves as a standard by which others may be measured. In the investment environment, the benchmark may be a common economic or financial index, such as the Consumer Price Index or the Standard & Poor's 500 (S&P 500) Index.

BONDS

Contract to pay specified sum of money (the principal or face value) at a specified future date (maturity) plus interest paid at an agreed percentage of the principal. Maturity is usually longer than one year. The relationship between the bondholder and issuer of the bonds is that of creditor and debtor. Thus, the holder has no corporate ownership privileges as stockholders do.

BROKER

A person who acts as an intermediary between a buyer and seller, usually charging a commission.

CASH EQUIVALENTS

Investment instruments have such high liquidity and safety that they are virtually as good as cash. They typically have a short maturity. Examples include a money market fund, Treasury Bills, and investments in a custodian bank's short term investment fund (STIF) or similar fund. Such securities help minimize risk during volatile market periods as well as to provide cash flow.

COLLATERALIZED MORTGAGE OBLIGATION (CMO)

A security created using the underlying cash flows from mortgage-backed securities as collateral. A CMO shifts the uncertainty regarding the exact timing of principal return in a mortgage-backed security. This uncertainty exists because the timing of mortgage-backed principal payments is influenced by changes in interest rates, the current economic climate, and the geographic makeup of loans.

COMMON STOCK

Share in a public company or a privately held firm. Common stockholders typically have voting and dividend rights. In the event of corporate bankruptcy or other liquidation of assets, common stockholders are paid after secured and unsecured creditors, bond holders, and preferred stockholders.

CORPUS

The principal of a fund or estate as distinct from income or interest.

CREDIT RISK

The likelihood that a party involved in an investment transaction will not fulfill its obligations. This type of risk is often associated with the issuer of the investment security and is affected by the concentration of deposits or investments in a single instrument or with a single institution.

CUSTODIAN BANK

Used by an entity with large investment holdings to hold securities, record transactions, and collect interest or dividends from investments. The custodian bank is sometimes referred to as the primary or master custodian because it obtains the services of subcontractors and agencies to actually hold and trade the securities.

DERIVATIVES

A contact or financial arrangement whose value is based on the performance of an underlying financial asset, index, or other investment. Derivatives are available based on the performance of assets, interest rates, currency exchange rates, and various domestic and foreign indexes.

DIVERSIFICATION

The spreading of risk by investing in several individual investments or categories of investments, such as stocks, bonds, cash equivalents, and real estate.

DURATION

A concept that measures bond price volatility by measuring the "length" of a bond. It is a weighted average term to maturity of the bond's cash flows, the weights being the present value of each cash flow as a percentage of the bond's full price. The greater the duration of a bond, the greater its percentage price volatility. In general, duration rises with maturity, falls with the frequency of coupon payments, and falls as the yield rises.

ENDOWMENT

Funds given to an entity, such as a college or university, with donor-imposed restrictions that the funds are not to be expended but are to be invested for purpose of producing income.

EQUITY INVESTMENT

Ownership interest processed by shareholders in a corporation.

EXTERNAL MANAGER

A person or firm that makes investment portfolio decisions and executes transactions independently, subject to the overall restrictions agreed upon by contract between the fiduciary for the fund and the external manager.

FIXED INCOME INVESTMENTS

A security that pays a fixed rate of return in the form of interest or dividends, over a specified period and includes government, corporate, and municipal bonds, preferred stocks, and certain mortgage investments. This asset class is expected to provide regular, predictable income and greater stability of market value than available from equity investments. It is advantageous in times of low inflation, but does not protect holders against erosion of buying power in times of rising inflation because interest or dividend payments do not increase.

GENERAL PARTNER

Member of a partnership who is jointly and severally liable for all debts incurred by the partnership; or a managing partner of a limited partnership who is in charge of its operations. A general partner has unlimited liability.

HEDGE/HEDGING

A strategy used to offset investment risk. A perfect hedge is one eliminating the possibility of future gain or loss.

HEDGE FUND

A hedge fund is typically set up as a private investment partnership that is open to a limited number of investors. The portfolios are typically managed more aggressively and rely on advanced investment strategies to generate high returns. Hedge Funds are not regulated by The Securities and Exchange Commission (SEC)

INDEMNIFICATION

An agreement to compensate another party for damage or loss. In securities lending programs, the program administrator may agree to indemnify the lender of securities for any losses caused by the failure of the borrower to return borrowed securities.

INDEX

A statistical composite that measures changes in the economy or in financial markets, often expressed in percentage changes from a base period. For example, the Consumer Price Index, which is composed of the prices of key goods and services, moves up or down as the rate of inflation changes. Other indexes measure the ups and downs of the stock, bond, and other investment markets. Common indexes include the New Your Stock Exchange Index, Standard & Poor 500 Index, and the Shearson Lehman Aggregate Bond Index.

INVESTMENT ADVISOR

A person or service retained by the investing entity to provide investment advice for a fee. The advisors may present economic information such as expected changes in interest rates, current and future national or global economic growth, and other factors that may affect the economy in the future. Investment advisors also present industry information that may affect future decisions in selecting specific securities. The advisor may specialize in a particular kind of investment, such as emerging growth stocks or international stocks.

LARGE / MEDIUM / SMALL CAPS

Stocks of companies with market capitalization of \$500 million or less are small caps. Such stocks generally represent companies that are less well established, but are often faster growing than mid-caps (market capitalization of \$500 million to \$3-5 billion) or large caps (\$1 billion or more). Small caps are often more volatile than stocks of more well-established companies.

LEVERAGED BUYOUT

Equity investments in public or private companies that result in the purchase of a significant portion or majority control of the company.

LIQUIDITY

The ease with which an asset can be converted to money. Also, the ability to buy or sell an asset quickly and in large volume without substantially affecting the price.

MARKET RISK

The risk that the value of a security will rise or decline as a result of changes in market conditions.

MATURITY

The date on which a debt's principal is to be repaid.

MEZZANINE FINANCING

Investment in the subordinated debt of privately owned companies. The debt holder participates in equity appreciation through conversion features such as rights, warrants, or options.

MERRILL LYNCH 90-DAY U.S. TREASURY BILL INDEX

A benchmark which assumes that treasury bills are bought at the beginning of a period at market value and held to maturity. Upon maturity, it is assumed that additional bills are purchased at market value and again held until maturity. The rollover continues until the end of the period. The calculation includes the sum of the yields earned by the treasury bills.

MODERN PORTFOLIO THEORY

An investment decision approach that permits an investor to classify, estimate, and control both the kind and the amount of expected risk and return. Portfolio theory quantifies the relationship between risk and return and assumes that investors must be compensated for assuming risk. It departs from traditional security analysis by determining the statistical relationships among securities comprising the overall portfolio rather than analyzing the characteristics of individual investments.

MUTUAL FUND

Portfolio of securities professionally managed by the sponsoring management company or investment company that issues shares to investors. The major advantages of mutual funds are diversification, professional management, and ownership of a variety of securities with a minimal capital investment.

PASSIVE PORTFOLIO STRATEGY

A money-management strategy that seeks to match rather than outperform return and risk characteristics of a market segment or index, by mirroring its composition.

PEER GROUP

One group that is of equal standing with another group. In comparing an investment fund's performance with its peers, the peer group should include other funds with similar characteristics, such as fund size, purpose, and investment restrictions.

PORTFOLIO

A combined holding of more than one investment. The purpose of a portfolio is to reduce risk by diversification.

PRIVATE INVESTMENTS

Investment opportunities, which have not been identified by traditional capital markets. Typically more volatile than

traditional securities, private investments require strong due diligence controls.

PRIVATE PLACEMENT

A securities issuance, which is exempt from registration requirements of the Securities Act of 1933. It generally involves the sale of stocks, bonds, or other investments directly to an institutional investor.

PRUDENT INVESTOR STANDARD

This standard provides that a board or other fiduciary in making investments, may acquire or retain any kind of investment that prudent investors, exercising reasonable care, skill, and caution, would acquire or retain in light of the purposes, terms, distribution requirements, and other circumstances of the fund then prevailing, taking into consideration the investment of all the assets of the fund rather than a single investment. Generally, this standard assumes that the board or other fiduciary has investment knowledge and expertise, and provides broader investment authority than the prudent person standard.

PRUDENT PERSON STANDARD

A concept born from the 1830 Massachusetts court decision of Harvard College v. Armory that described the duty owned by a trustee to beneficiaries: "All that can be required of a trustee to invest is, that he shall conduct himself faithfully and exercise sound discretion. He is to observe how men of prudence, discretion, and intelligence manage their own affairs, not in regard to speculation, but in regard to the permanent disposition of their funds, considering the probable income, as well as the probable safety of the capital to be invested."

RISK

In exchange for a return on investment, the investor may expose assets to possible losses. Risk is the probability or possibility of such losses. Risk is also often defined in terms of market volatility, or standard deviations of returns. The standard deviation is a statistical measure of portfolio risk, which reflects the average deviation of observations from their sample mean. It is used as an estimate of risk because it measures how wide the range of returns typically is. The wider the range of returns, the higher the portfolio risk.

S&P 500

An index, which measures the performance of the common stock of 500 of the largest U.S. corporations. The S&P 500

represents the aggregate market value changes relative to a base period of 500 stocks primarily traded on the New York Exchange.

S&P 1500

The S&P 1500 Composite Index, which measures the performance of the top 1500 U.S. companies.

SECURITIES LENDING

A program in which institutional investors transfer their securities to broker-dealers and other borrowers in exchange for collateral and a promise by the borrower to return the identical securities. The collateral may consist of cash, securities, or letters of credit. The lender agrees to the collateral to the borrower upon maturity of the loan and return of the borrowed securities.

TIME-WEIGHTED RATE OF RETURN

The total rate of return on an investment adjusted to eliminate the effect of timing of cash flows due to contributions and withdrawals, which are not controllable by investment managers.

TOTAL RETURN

The annual return on an investment including appreciation and interest or dividends. A "total return fund" is one that is indifferent to whether the return is generated by appreciation or ordinary income because it can spend from both categories

TRANCHE

A class into which a multi-class security, such as collateralized mortgage obligation (CMO) is split. The different tranches of a CMO, which may range from a fast-pay class to long-term slow-pay class, are designed to meet different investor objectives for portfolio diversification.

VENTURE CAPITAL

Venture capital is an important source of financing for startup companies or other embarking on a new or turnaround ventures that entail some investment risk but offer the potential for above average future profits. Sources of venture capital include wealthy individual investors, subsidiaries of banks and other corporations organize as small business investment companies: groups of investment banks and other financing sources that pool investments in venture capital funds or venture capital limited partnerships. Some venture capital sources invest only at a certain stage of entrepreneurship, such as the start-up or seed money stage, the first round or second round phases that follow, or at the mezzanine level immediately preceding an initial public offering. In return for taking an investment risk, the venture capitalists are usually rewarded with some combination of profits, preferred stock, royalties on sales, and capital appreciation of common shares.

VOLATILITY

The extent to which a security or market tends to rise or fall sharply in price within short-term period.

YIELD

The annual return on investment (from dividends or interest) expressed as a percentage of either cost or current price. Yield is one component of return.

Percentage of Assets Externally Managed

See Note 1

Note 1: As of March 1, 2001, the PHF and LTF purchased units in the newly created General Endowment Fund (GEF) in exchange for their contribution of investment assets. The GEF, established by the Board of Regents effective March 1, 2001, is a pooled fund for the collective investment of long-term funds under the control and management of the Board. The GEF is organized as a mutual fund in which the PHF and LTF are the only unit holders. As of August 31, 2008, the PHF had a 16.2% ownership of the GEF. The returns by asset class for the GEF for fiscal year 2008 are shown above.
