Adult Correctional Recidivism

Legislative Budget Board
Criminal Justice Data Analysis Team
March 2012

Criminal Justice Data Analysis Team – Structure and Staff Members

- Michele Connolly Manager
- Laurie Molina Adult Data Analysis
- Jamie Gardner Juvenile Data Analysis
- Ed Sinclair Field and Qualitative Research

Criminal Justice Forum Logistics – Forum Parameters

- Diverse group of participants
- A learning opportunity for all
- Limited to a subject area
- Format:

5 minutes for overview and orientation

45 minutes for presentation of policy issues, methodologies, and key findings

30 minutes for questions and answers

Criminal Justice Forum Ground Rules – Presenter Information

- Legislative Budget Board (LBB) staff
- LBB staff members are non-partisan
- Staff are not in a position to provide personal opinions
- Criminal Justice Data Analysis Team focus is on policy-oriented analysis

Agenda

- What is recidivism?
- Why does LBB track it?
- How does LBB measure it?
- What does LBB know and how does Texas compare to other states?
- Next Steps

Most Recent Recidivism Report

- Statewide Criminal Justice Recidivism and Revocation Rates, January 2011
 - http://www.lbb.state.tx.us/PubSafety_CrimJustice/3_Reports/Recidivism_Report_2011.pdf

Definition of Recidivism

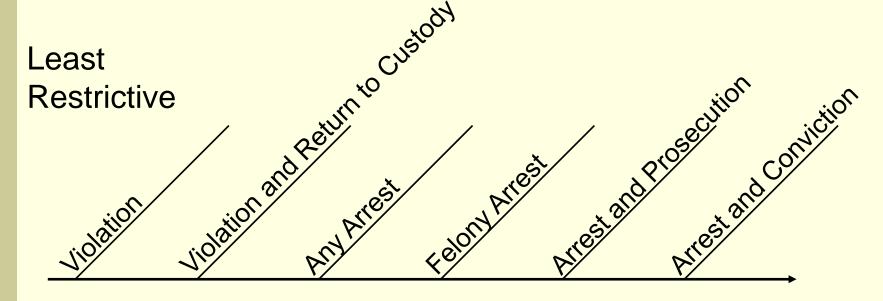

- In general terms, recidivism is defined as a return to criminal activity. Recidivism can be measured in terms of rearrest, reconviction, and/or reincarceration.
- Recidivism, in a criminal justice context, can be defined as the reversion of an individual to criminal behavior after he or she has been convicted of a prior offense, sentenced, and (presumably) corrected.

Maltz, Michael D. ([1984] 2001). Recidivism. Originally published by Academic Press, Inc., Orlando, Florida. Internet edition available at http://www.uic.edu/depts/lib/forr/pdf/crimjust/recidivism.pdf.

Characteristics of Measures

- Measurable and Trackable
- Comparability
- Type I Error Include those who should be excluded
 Arrested and didn't do it
- Type II Error Exclude those who should be included Committed crimes but not caught

Recidivism Measure Continuum

Most Restrictive

Recidivism Standard

 A rearrest for a new separate offense that is punishable by confinement (i.e., Class B Misdemeanor and above)

■ Time period of 1, 2, and 3 years

Survival model that censors after first failure

Purpose of Recidivism Analysis

- Factor in developing recommended appropriation amounts for criminal justice related programs
- Fiscal note
 - Written estimate of the direct costs, savings, revenue gain, or revenue loss that may result from implementation of a bill or joint resolution that increases or decreases correctional populations
- Criminal Justice Impact Statement
 - Written estimate of the increase or decrease in correctional populations that may result from implementation of a bill or joint resolution
- Resource for staff (LBB, legislative, and state agency)

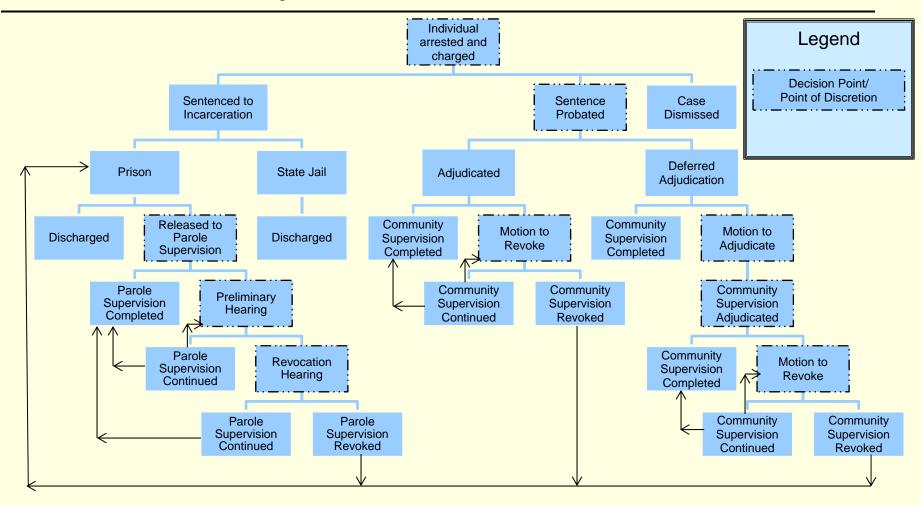

Recidivism as a Performance Measure in General Appropriations Act

- TDCJ Goal C.: Incarcerate Felons
 - Three-year Recidivism Rate
- TDCJ Goal F.: Operate Parole System
 - Releasee Annual Revocation Rate
- TDCJ Rider 52: Monitor Community Supervision Diversion Funds

Background

- HB 2335, 71st Legislature, Regular Session, 1989 directed the Criminal Justice Policy Council to conduct a study to develop uniform recidivism and revocation rates for all criminal justice agencies (March 1991).
- Criminal Justice Policy Council calculated and reported recidivism through January 2003.
- Legislative Budget Board began reporting adult recidivism in January 2005.

What is the process for adults going through the Justice System?

January 2005 Recidivism Report

 - Reincarceration

Felony Community Supervision – Overview

- The Texas Department of Criminal Justice Community Justice Assistance Division provides funding and oversight of community supervision in Texas
- Community Supervision and Corrections Departments (CSCDs) supervise offenders
 - 121 CSCDs in Texas, organized within judicial districts, serving
 254 counties
 - Case-based statewide tracking system for adult offenders under community supervision (Community Supervision Tracking System/Intermediate System) became the primary data source for population reporting purposes during fiscal year 2010

Felony Community Supervision – Revocations

- Revocation Community supervision may be revoked and the offender maybe sentenced to imprisonment or confinement for violating conditions of supervision
 - Technical
 - Non Technical
- Revocation Rate The number of felony revocations during a given fiscal year divided by the average felony direct supervision population for that same fiscal year

Felony Community Supervision – Revocations by Destination

Felony Community Supervision – Revocation Statistics

- Majority of revoked direct supervision felons are sentenced to prison or state jail (95% in FY 2010).
- Approximately one-half of the felony revocations are for subsequent new offense convictions or arrests.
- Felony community supervision revocations account for approximately one-third of prison and state jail admissions annually. For example, in fiscal year 2010, there were 66,395 prison and state jail admissions and 24,216 of them (36%) were felony community supervision revocations.

Felony Community Supervision – Revocation Rates

AVERAGE FELONY DIRECT SUPERVISION POPULATION	FELONY REVOCATIONS	REVOCATION RATE
160,457	22,164	13.8%

Correctional Institutions – Overview

- The Texas Department of Criminal Justice Correctional Institutions Division oversees state prisons, state jails, pre-release facilities, psychiatric facilities, a Mentally Retarded Offender Program facility, medical facilities, transfer facilities, a geriatric facility, and Substance Abuse Felony Punishment Facilities (SAFPF).
- SAFPF A facility that provides an intensive six-month therapeutic community program for offenders who are sentenced by a judge as a condition of community supervision or as a modification of parole/community supervision.
- In-Prison Therapeutic Community (IPTC) A therapeutic community program that provides six months of treatment for offenders who are within six months of parole release and who are identified as needing substance abuse treatment. Placement in the program is subject to approval from the Board of Pardons and Paroles. Programming is similar to that of the SAFPF program.

Correctional Institutions – Overview

- State Jail − A state jail is a facility that houses offenders who receive conviction sentences of two years or less. State jail sentences cannot exceed two years for one offense, but a repeat offender may receive overlapping state jail sentences not to exceed three years. State jail offenders are usually convicted of property and low-level controlled substance offenses. The offenders must serve their entire sentence and do not receive good conduct credit. They are released by discharge. State jails also temporarily house prison-transfer offenders (who are not included in this analysis).
- Prison A prison is a facility that houses offenders who receive capital, first-degree, second-degree, or third-degree felony sentences. For the purpose of this report, all classes and custodies of inmates are included with the exception of death row, shock probation, state boot camp, and SAFPF offenders. Prison offenders may be released from prison under parole supervision, discretionary mandatory supervision, mandatory supervision, or discharge.

25

Correctional Institutions – Reincarceration

- Reincarceration Offenders released from institutional settings during a specific time period (e.g., FY 2006) are tracked for three years. Each offender who returned to state jail or prison at least once during the three-year follow-up was considered a recidivist.
- Reincarceration Rate The number of offenders who returned to incarceration during a given year divided by the number in the release cohort.

Correctional Institutions – Rearrest

- Rearrest Offenders released from institutional settings during a specific time period (e.g., FY 2006) are tracked for three years. Each offender who was arrested for a Class B Misdemeanor or greater during the three-year follow-up was considered a recidivist.
- Rearrest Rate The number of offenders who were rearrested during a given fiscal year divided by the number in the release cohort.

March 2012

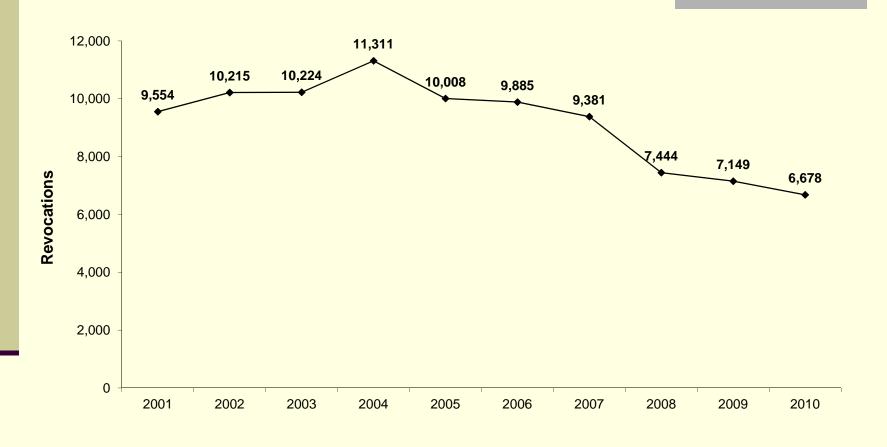

Parole Supervision – Overview

- The Texas Department of Criminal Justice Parole Division supervises offenders released from prison who are serving the remainder of their sentence under supervision in the community.
- Intermediate Sanction Facilities (ISF) A short-term, detention facility used for offenders who violate conditions of their parole or mandatory supervision.

Parole Supervision – Revocations

- Revocation An offender under parole or mandatory supervision may be revoked and sent back to prison by the Texas Board of Pardons and Paroles.
 - Technical
 - Non Technical
- Revocation Rate The number of revocations during a given fiscal year divided by the average active parole population for that same fiscal year.

Parole Supervision – Revocations

Fiscal Year

Parole Supervision – Revocation Statistics

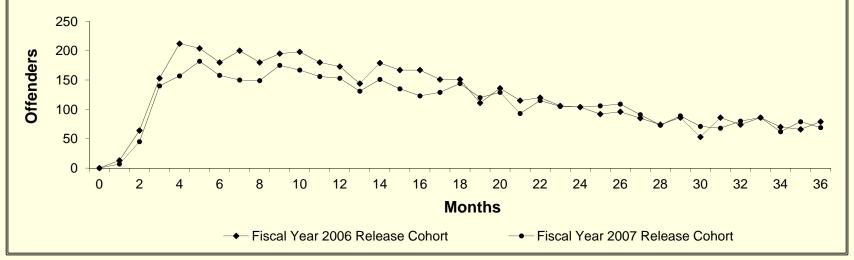

- Approximately 80% of parole revocations to prison are for subsequent new offense convictions or arrests.
- Parole supervision revocations account for less than 20% of prison admissions annually. For example, in fiscal year 2010, there were 42,858 prison admissions and 6,678 of them (16%) were parole revocations.

Parole Supervision – Revocation Rates

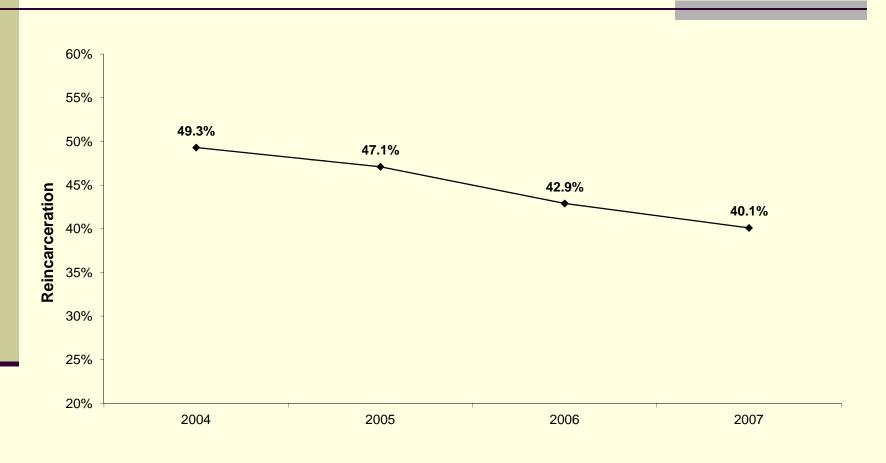

FISCAL YEAR	AVERAGE ACTIVE PAROLE POPULATION	PAROLE REVOCATION ADMISSIONS TO PRISON	REVOCATION RATE

	March 2012	Legisla	ative Budget Board	43	

Texas Recidivism Rates versus Other States

Reincarceration rates can be notably affected by state parole violation policies.

- (a) California's rate of return is for felons released on parole.
- (b) Colorado's rate of return is for inmates released to parole, sentence discharges, court order discharges, and probation releases.

Texas Recidivism Rates versus Other States

- (c) Florida's rate of return includes new convictions and violations of post prison supervision.
- (d) Illinois' rate of return includes new crimes and violations of parole.
- (e) New York's rate of return includes new felony convictions and violations of parole.
- (f) Pennsylvania's rate of return includes returns to custody for any reason.

Next Steps

- Update follow-up periods for all cohorts
- Executive brief to summarize findings in a more concise manner
- Next recidivism report will be released in January 2013
- Calculate recidivism measures using individual-level data for adult probation and include in January 2015 report

Questions?

Facilitated Discussion

- Is there additional information that we should consider when producing this report?
- Are there other ways we can learn of planned policy and practices that impact populations?
- Are there any other ways to improve the methodology?

Facilitated Discussion

- Are you conducting or planning on conducting research related to population projections?
- Do you use projections in your current work/research or could you see projections being helpful in your work/research?

How can I be involved in the legislative process?

- Senate Finance Committee
- House Appropriations Committee
- Senate Criminal Justice Committee
- House Corrections Committee
- House Criminal Jurisprudence Committee
